

Content Integration TA

Wednesday, 16 November 2005

Travis Wissink, Founder and Consultant, TLC, presented Content Integration Technical Architectures at KMWorld 2005.

From the brochure:

Session D201 — Technical Architectures: CM, Portals, & Content Integration
10:30 a.m. — 11:15 a.m.
Janus Boye, Managing Director, Boye IT, Denmark
Travis Wissink, Principle Architect, Anexinet

Content management systems rarely exist on their own. More often than not, CMS licensees must integrate a CMS with other content repositories as well as portals. In this session, two experienced architects explore alternatives for bridging CMSs and portals, and for integrating diverse content stores.

Please review the powerpoint deck .
